

Workshop Description

Z02- “EMG recordings Workshop” for early career researchers in December 2022

The central project Z02 “ANIMAL MOTOR CIRCUITS CORE FACILITY” invites all doctoral students and Postdocs of the CRC 1451 to the first Z02 workshop that will take place in December 2022.

The task of the central project Z02 is to characterise and quantify animal motor and cognitive behaviour and to assess the underlying neural mechanisms.

The workshop comprises theory and “hands-on” sessions on EMG recordings in mice:

1. Theory of EMG recordings – 1 lecture (2 hours max)
2. EMG electrode making – 1 half day
3. EMG implant/surgery/recording – 3 full days
4. EMG analysis – 1 day

Please note that no Felasa is needed for attendance and the tentative schedule may change depending on attendance requests.
